

UPCM-PGH RESEARCH FLOWCHART

Ref:TRB/ TRB Review Process

All research protocols of UPM constituents should be reviewed by the technical review committee in their respective units/colleges. For sponsor-initiated clinical trial, the technical review may be provided by the sponsor but the TRB member of the department/unit to which the PI belongs should approve (technically) the protocol.

Procedure:

1. Obtain a copy of the UPCM RIDO Form 012 v 5 from RIDO.
2. Submit to RIDO TRB Member the following: 1) UPCM RIDO Form 012 v5. 2) a hard copy of research proposal. For LU 3 students, obtain a certificate or letter from IDC Coordinator (Dr. Mantaring) stating that such research has been reviewed by the LU 3 panel. Attach the certification/letter of Dr. Mantaring to the duly accomplished UPCM RIDO Form 012 v.5. No need to submit to a TRB member since the certification/letter will suffice for the review/approval.
3. Upon TRB approval, Department Chair endorses the TRB approved research proposal by signing in the UPCM RIDO Form 012 v.5
4. Submit to RIDO, together with the following, for endorsement of the Chief:
 - a) UPCM RIDO REG Form 1 v.2,
 - b) Duly signed UPCM RIDO Form 012 v5,
 - c) a CD/DVD copy of research proposal or may be submitted thru email to rido.upcm@gmail.com.
5. This duly accomplished UPCM RIDO Form 012v.5 will support researchers' request for ethics review by the UPM REB/ IACUC/ IBC.
